PrintNode Connector PowerTool

Connect your local or network printers to Dynamics 365 Business Central Cloud

- Makes printing seamless – no more downloading PDFs to print
- Simple single-field setup
- Uses standard Business Central printer management capabilities and supports RAW printing
- Standard non-RAW printing works with all standard and custom reports and pages, including barcode labels
- Supports RAW so you can print your own custom label data or ZPL files

www.dmsiworks.com

The screenshot shows the Microsoft AppSource page for the 'Insight Works PrintNode Connector'. At the top, there is a Microsoft logo and a 'Sign in' button. Below the header is a search bar. The main content area features the app's icon, which is a green square with a white printer icon and the text 'PrintNode Connector PowerTool'. To the right of the icon, the app is titled 'Insight Works PrintNode Connector' and is attributed to 'Insight Works'. It is listed as a 'Dynamics 365 Business Central' app with a 4.7 star rating from 9 reviews. Below this information are two buttons: 'Pricing: Free' and 'Get it now'. Underneath the buttons are tabs for 'Overview', 'Ratings + reviews', and 'Details + support'. The 'Overview' tab is selected, showing a description of the app: 'Connect your local or network printers to Dynamics 365 Business Central Cloud.' It also provides a link to the PrintNode Connector website: <https://www.dmsiworks.com/products/printnode-connector/>. The text explains that the app allows users to print multiple reports and documents to different printers without having to print each one individually or print to PDF. It mentions that the app is a free add-on that allows users to make use of the free or paid PrintNode.com service to automatically print reports to a specified printer. It also states that users can print from the Business Central web client, the phone or tablet apps, or any other connected device to any local or network printer. Setup is described as extremely simple and no programming is required to use the integration. Simply enter your PrintNode API key once during setup, and then use the standard Business Central Printer Administration page to set the printer you'd like to use for each report, or just select the printer each time you print. On the right side of the page, there is a disclaimer: 'By getting this product, I give Microsoft permission to use or share my account information so that the provider can contact me regarding this product and related products. I agree to the provider's terms of use and privacy policy and understand that the rights to use this product do not come from Microsoft, unless Microsoft is the provider. Use of AppSource is governed by...'

Import Export PowerTool

Turbocharge your data migration and management tasks with lightning-fast imports & exports, updates, and deletes

- Swiftly import, export, update, or delete data in any table.
- Achieve 30x faster data imports compared to RapidStart Configuration Packages.
- Export data at a significantly higher speed than RapidStart.
- Utilize existing Configuration Package definitions for quick exports.
- Import/export record links and notes, auto-insert lot/serial numbers, and work with text files without Excel.
