

LICENSE PLATING

for Microsoft Dynamics 365 Business Central

Effortlessly monitor mixed items across pallets, boxes, or containers with unique LPNs for unmatched tracking precision.

Revolutionize your warehouse management with License Plating from Insight Works. This Dynamics 365 Business Central add-on, designed for Warehouse Insight, offers a simplified way to track mixed items with unique LPNs. Simplify tasks with easily printed barcodes, reduce manual scans, and boost productivity.

License Plating delivers improved accuracy, faster transactions, and efficient operations for any manufacturing, distribution, or retail environment. Experience smarter warehouse management with License Plating from Insight Works..

Transforming Warehouse Operations with License Plating: Efficiency, Productivity, Accuracy, and Versatility

- **Improved Efficiency:** Simplify warehouse transactions and streamline operations with single LPN scans.
- **Enhanced Productivity:** Speed up transaction processes and reduce time spent on manual input, boosting overall worker productivity.
- **Increased Accuracy:** Reduce the potential for errors and enhance inventory accuracy by minimizing manual input and scanning.
- **Optimized Supply Chain Management:** Overcome supply chain challenges by simplifying the tracking of mixed items.
- **Better Data Integrity:** With fewer chances for manual input errors, maintain high standards of data integrity.
- **Versatile Implementation:** Enjoy the flexibility to manage warehouse processes across various sectors, including manufacturing, distribution, and retail.

Typical Users:

Warehouse Managers: Oversee operations, need tracking and transaction solutions.

Inventory Specialists: Maintain accuracy, need simplified tracking tools.

Supply Chain Coordinators: Manage logistics, need efficient tracking means.

Distribution Center Operators: Oversee processes, need easy item monitoring.

Retail Store Managers: Handle inventory, need simplified tracking.

Manufacturing Plant Supervisors: Manage production and storage, need efficient tracking system.

LICENSE PLATING

Unique LPN Generation

Create unique License Plate Numbers (LPNs) for every pallet, box, or container.

Mixed Item Tracking

Capable of managing and tracking mixed items and mixed lot/serial numbers within a single LPN.

Reduced Scanning Requirement

Allows transaction processing with a single LPN scan, reducing the number of scans typically needed.

Direct Barcode Printing

Generates and prints LPN barcodes directly from handheld devices.

Seamless Integration

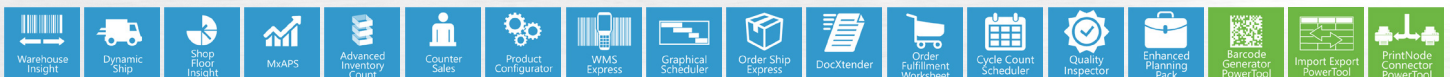

Specifically designed as an add-on for Dynamics 365 Business Central, working in tandem with the Warehouse Insight app.

The screenshot shows the 'Insight Works License Plate Setup' form in Dynamics 365 Business Central. It is divided into two main sections: 'General' and 'Shipping'. The 'General' section includes fields for 'License Plate No.', 'LPN LP', 'Transfer Order Suffix', 'LP Bin Move Batch Name', 'LP Bin White Move Batch Name', 'LP Bin Change Behavior', 'Request LP On Output', and 'Allow Embedded License Plates'. The 'Shipping' section includes fields for 'Default LP Minimum Weight', 'Default LP Minimum Weight', 'Default LP Minimum Cubage', 'Default LP Minimum Cubage', 'Dimensions Unit of Measure', 'Cubage Unit of Measure', 'Weight Unit of Measure', and 'Status'. There are also buttons for 'Show more' and 'Save'.

The screenshot shows the 'Insight Works License Plate' form in Dynamics 365 Business Central. It includes a 'General' section with fields for 'No.', 'Description', 'Sample Code', 'Location Code', 'Bin Code', 'Status', 'Initial', 'Serial Document', 'Source No.', 'Shipped Source Document', 'Shipped Source No.', 'Unshipped on Receipt', and 'Parent License Plate No.'. There is also a 'Package Carrier Label' section with a 'SAMPLE LABEL' button. The bottom section is a table with columns: 'Type', 'No.', 'Variant Code', 'Description', 'Quantity', 'Serial No.', 'Lot No.', 'Unit of Measure Code', 'Expiration Date', 'Time Card Number No.', 'SP Employee No.', and 'Print Order No.'. The table contains three rows of data.
