Introduction

Supplying business software with expertise since 1978.

Dedicated to building better business systems for over 40 years.

Formed in 1978 Diskel Limited has a wealth of experience in the provision of integrated business solutions. We have a proven track record of successfully delivering IT solutions across a broad range of industries throughout the UK.

As a Microsoft Partner, we are committed to providing an exceptional service based upon partnership, technical expertise and customer focus. It is our belief that by working with you closely, and providing cost effective business solutions, we will gain your trust and continually exceed your expectations.

The proper selection of a consulting and support organisation can be the difference between a successful or marginal implementation of a computerised system. Diskel will partner with you to meet today's objectives and plan the flexibility you'll need to move forward and direct your future.

We aim to provide a "Complete Solution" taking responsibility for all elements of an entire project and continue to offer new and improved technologies to better your competitive edge.

About Diskel

Complete
Solutions

At Diskel, our mission is to empower businesses through innovative, bespoke solutions that enhance efficiency and drive growth. We are committed to excellence, integrity, and continuous improvement, ensuring our clients can thrive in a dynamic and ever-evolving market

At Diskel, we transform challenges into innovative solutions, empowering businesses to thrive in a rapidly evolving world

Vision & Mission

Vision:

At Diskel, our vision is to be the leading provider of innovative solutions that empower businesses to achieve their full potential and drive sustainable growth in an ever-evolving digital landscape.

Mission:

Our mission is to deliver exceptional, customised services and solutions that exceed our clients' expectations. We are committed to fostering a culture of excellence, collaboration, and continuous improvement, while ensuring the highest standards of integrity and professionalism in all our endeavours.

Value:

We are committed to continuous innovation, always seeking new ways to improve and stay at the forefront of technological advancements.

Exceeding customer expectations by delivering the quality products and services is our priority.

Our Services

At Diskel, we provide comprehensive solutions to meet all your business needs:

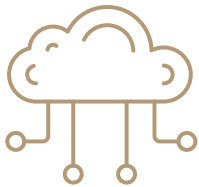

ERP Solutions

We offer advanced tools to streamline your financial processes, including accounting, manufacturing, WMS, CRM, CIS and payroll management systems.

Managed IT Services

Our comprehensive IT support includes proactive maintenance, updates, monitoring, and troubleshooting for your systems.

Cloud Services

Our scalable cloud services include hosting and storage that enhance collaboration and efficiency.

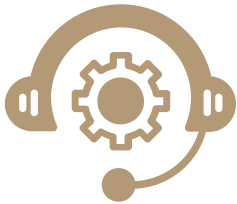

Cyber Security Solutions

Our partnership with leading cyber defence solutions protect your data and systems with firewalls, anti-virus software, and threat detection.

& Solutions

"Enhancing Your Business with Advanced IT Solutions"

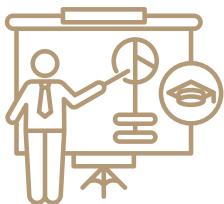

IT Consultancy

Our Tech Team provide advice on technology adoption, system upgrades, and digital transformation to help you achieve optimal results.

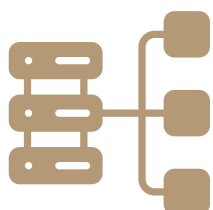

Business Continuity and Disaster Recovery

We develop plans to minimise downtime and ensure quick recovery from disruptions, including data backups and recovery strategies.

Training and Support

We offer customised training sessions and ongoing support to keep your team and systems performing optimally.

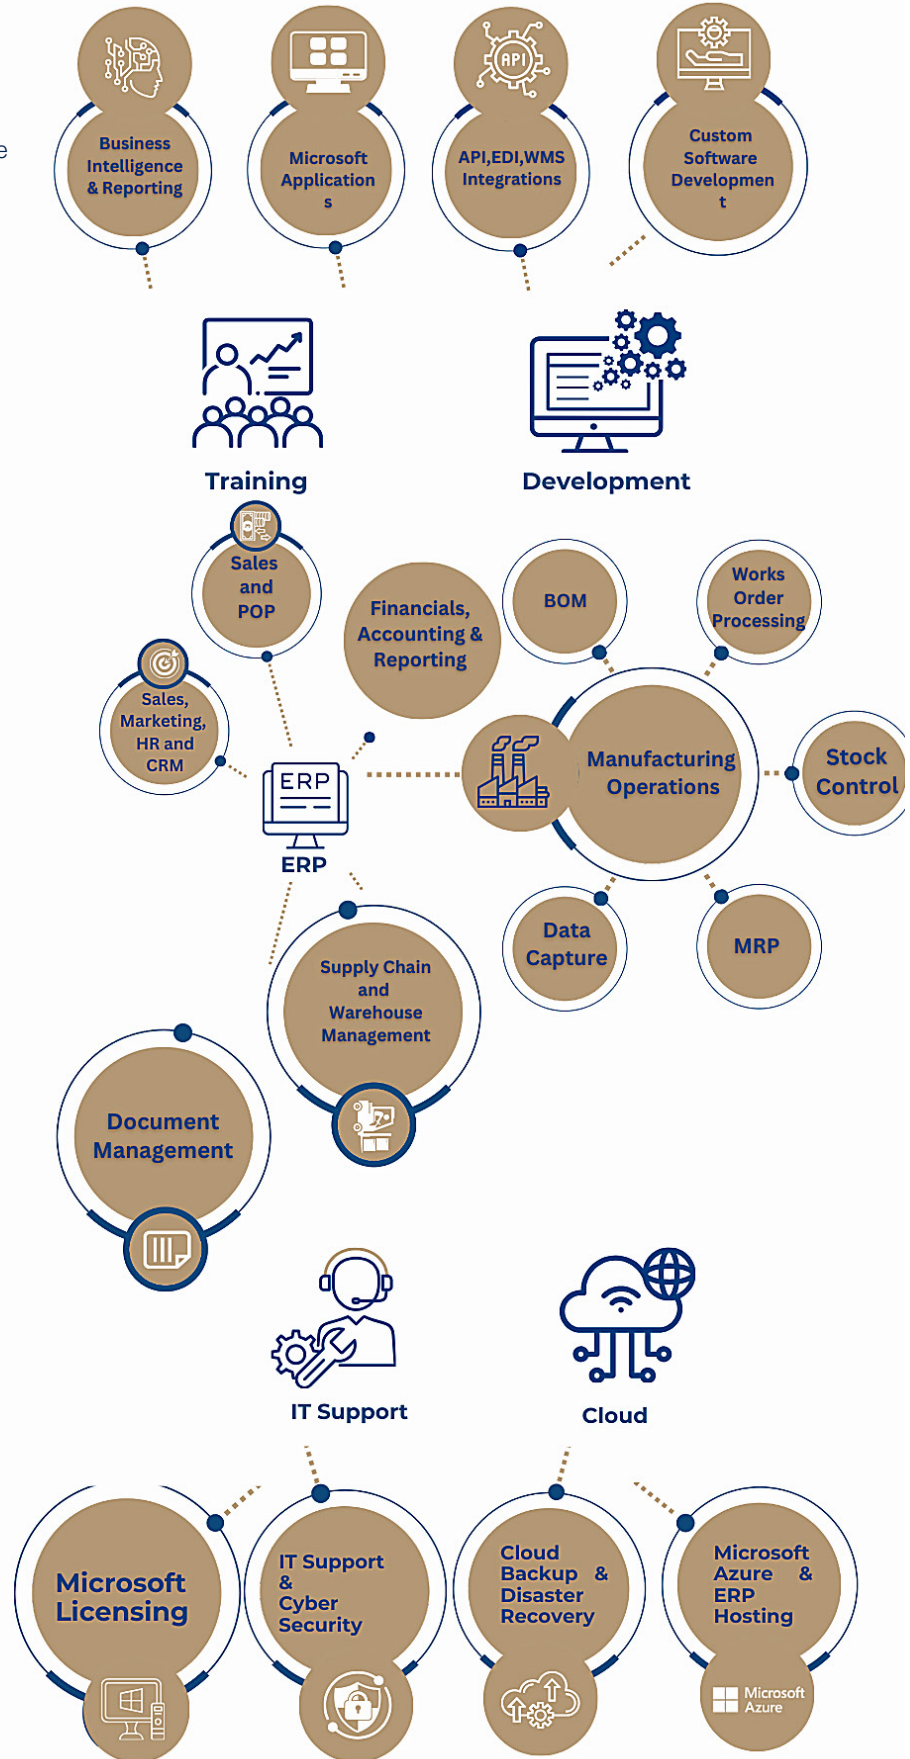

Customisation & 3rd Party Integrations

Experience seamless Customisation and 3rd Party Integrations designed to enhance your business's unique needs and streamline your operations.

Integrated Solutions for Businesses

Uniting technology, we combine cutting-edge solutions to establish a secure and seamless digital environment, enabling businesses to prosper and succeed.

Data Analysis & Customisation

Our Expertise

AP Automation

Streamlined accounts payable processes.

Document Management

Efficiently manage and store documents.

Bespoke Applications

Develop software tailored to your specific business needs.

Power BI

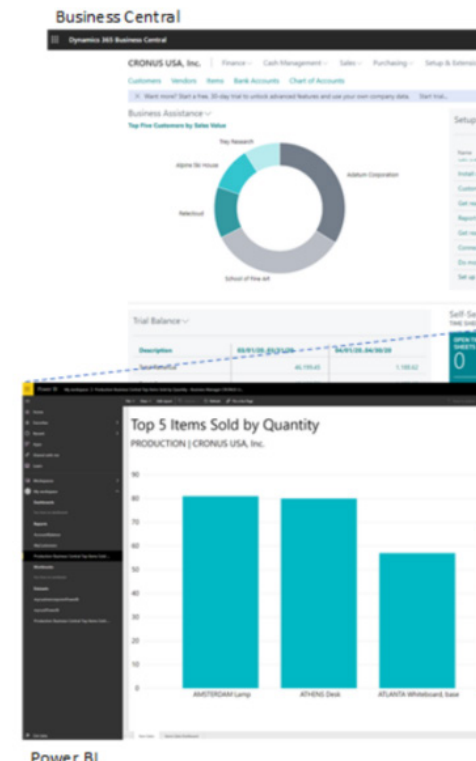

Harness the power of data with our Power BI integration services. We transform your raw data into insightful, interactive dashboards and reports, enabling you to make informed decisions with ease. Our solutions are tailored to provide real-time analytics and visualisations that drive strategic growth.

API Development & Integration

We excel in developing robust APIs that facilitate seamless communication between your systems and third-party applications. Our API solutions ensure secure, scalable, and efficient data exchange, enhancing the functionality and interoperability of your software.

Third Party Integrations

Maximise the potential of your existing systems with our third-party integration services. We integrate a wide range of external applications and services, ensuring they work harmoniously with your current infrastructure. This approach not only enhances productivity but also streamlines your business processes.

Custom Software Solutions -

Understanding that every business is unique, we offer bespoke software development services. From initial consultation to deployment and support, we work closely with you to create solutions that are perfectly aligned with your business objectives.

Empowering Small and Medium-Sized Enterprises

In the modern business landscape driven by data, possessing real-time analytics and reporting is essential rather than optional. Small and medium-sized enterprises (SMEs) greatly benefit from Business Central's comprehensive, built-in analytics and reporting features, which seamlessly monitor various business activities right out of the box.

Adaptability Across Business Models: No One-Size-Fits-All

Business Central is crafted to accommodate both standard and intricate business procedures. Each procedure is paired with detailed reporting and analytics tools, enabling you to delve deeper into your data. There's no need to switch applications; ad-hoc analysis is conveniently available directly from your Home page, offering instant insights when they are most needed.

Enhanced Financial Reporting: Mastering Your Account Schedules

Account schedules are an effective tool for financial reporting in Business Central. This feature extends beyond just accountants and controllers, allowing a wider range of stakeholders to extract crucial business data from sources such as the chart of accounts, budgets, cash flow accounts, and cost types.

Data-Driven Decision Making: Transforming Insights into Actions

Leverage this wealth of data to continuously evaluate your business's health and make significant contributions to strategic decisions. With the flexibility to define row and column layouts, Business Central makes it easy to generate customised reports. You can calculate totals and sub-totals and manage print outputs to create relevant comparisons, whether it's current figures against historical data or budgetary changes over time.

How we work

AIM (Application Implementation Methodology) is a structured methodology for the implementation of financial and operational systems.

It was developed by Diskel consultants to provide a secure yet flexible framework for the management of implementation projects, drawing upon our experience in this field over the last 40 years. This document is intended to provide an overview of the process.

AIM was developed as an eight step methodology capable of incorporating all aspects of systems implementation from initial project planning through to final testing, live running and system handover. It can be applied to complex multi site implementations systems or to the most straight forward of single user requirements.

The concept is simple - by using a tried and tested structure approach, risk is reduced and consultants do not have to spend significant amounts of time creating the tools from scratch with which to carry out each new assignment.

The eight phases are designed to assure that the needs of the organisation are clearly identified and are met by the final system implementation. The eight basic phases are set out on the left and each phase is discussed in a little more depth below.

The Eight Phases

- Phase 1 Project Planning
 - Phase 2 IT Infrastructure
 - Phase 3 Software Installation
 - Phase 4 Business Process
Review & Application Configuration
 - Phase 5 Key User Testing
 - Phase 6 User Training
 - Phase 7 Data Migration
 - Phase 8 Project Review and Close
